

# EXPLORE *The World*

## 2024 CIMT SUMMER CAMP

We are thrilled to announce that applications are now open for the 2024 CIMT Summer Camp – an unforgettable 3-week adventure for campers of all ages! Embark on a journey through space, on land, and in the sea, navigating through exciting therapeutic activities and fun games.

When it comes to Constraint-Induced Movement Therapy (CIMT) for children, Crossway Pediatric Therapy stands out as a beacon of excellence, bringing 15 years of unparalleled experience to families around the globe.

## JULY 08-26

### What is CIMT?

Constraint-Induced Movement Therapy (CIMT) is a therapeutic approach designed to improve the use of an affected limb, typically an arm, in individuals who have experienced neurological injuries such as stroke or brain injury. The fundamental principle of CIMT is to encourage the intensive use of the affected limb by constraining or limiting the use of the unaffected limb. This constraint is achieved through the use of a removeable cast.
